

1. **Collapsible step stool** (you have to climb up to check the fuel in a C-182)
2. **Tow Bar** (Dulles Aviation has these on the ramp, but this one is small/collapsible, and useful for when you fly elsewhere).
3. **Windshield Washer/scrapers** (probably if you need these, you're certified to fly IFR)
4. **Water container and salt** (I guess this is useful?)
5. **Rope**(always good to have on hand)
6. **Urinals** (self-explanatory)
7. **Utility knife** (see "rope")
8. **Jumper cables** (you can't just use what's in your car, so this is pretty critical to ensure you don't end up stranded)
9. **Garbage**
10. **Bungees** (to strap down your stuff)
11. **Oil** (especially good to have on hand for long flights).
12. **Duct tape** (see "rope")
13. **Tie downs** (these operate like the tie-downs on a tent - complete with pegs)
14. **Hammer** (for the tie down pegs)

Collapsible step stool

Tow Bar

Windshield Scraper

H2O Container

Portable urinals

Rope

Salt

Jumper cables

Utility knife

Duct Tape

Garbage

Hammer

Tie Downs

Oil

Bungees
